

Subject : Application Development Using Full Stack
(701)

Assignment-1

Name : Anghan Deep J.

Sem : M.Sc(IT) 7th

Div : B

Roll No : 140

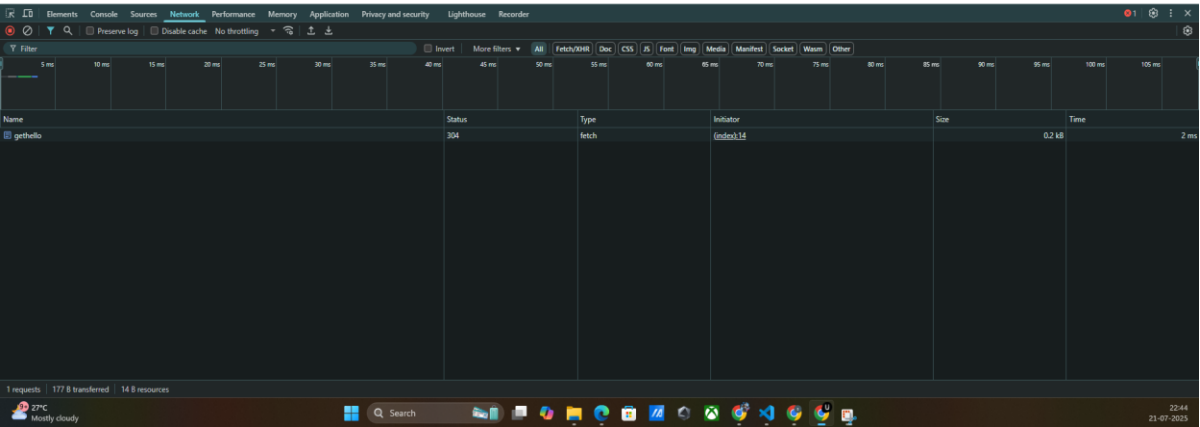

SPID : 2022026127

Problem - 1

Question 1

Get Hello
Hello NodeJS!!!

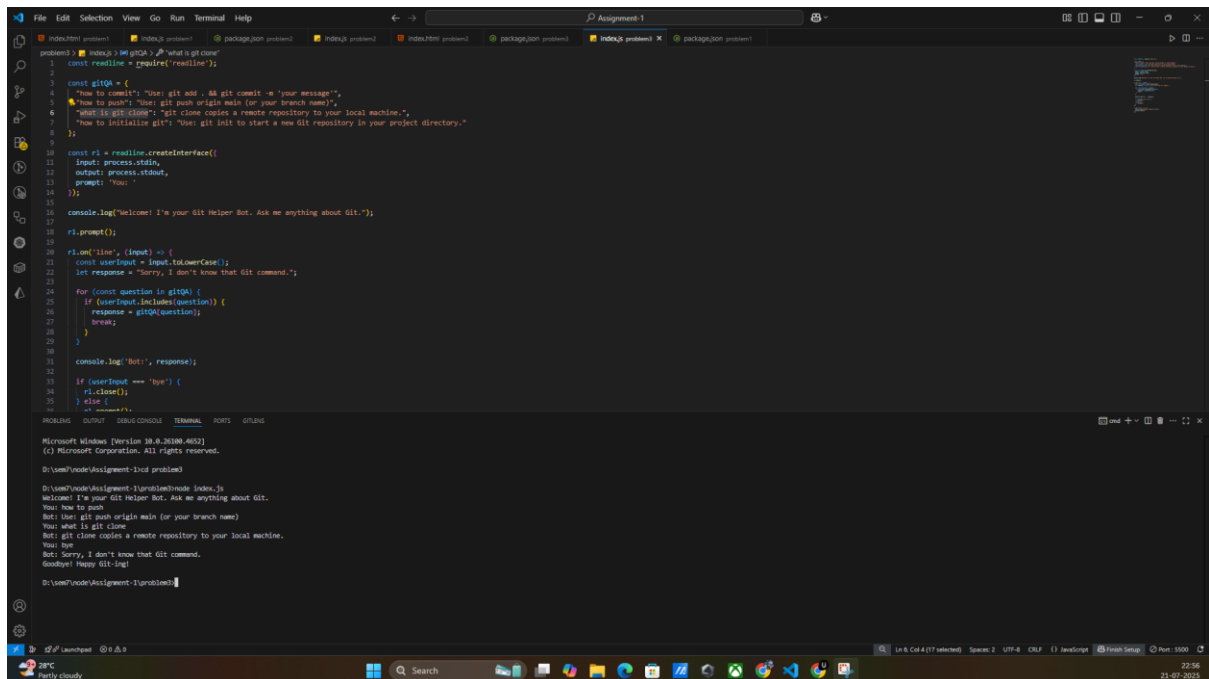

Problem – 2

This is Static File as HTML Content

Problem – 3

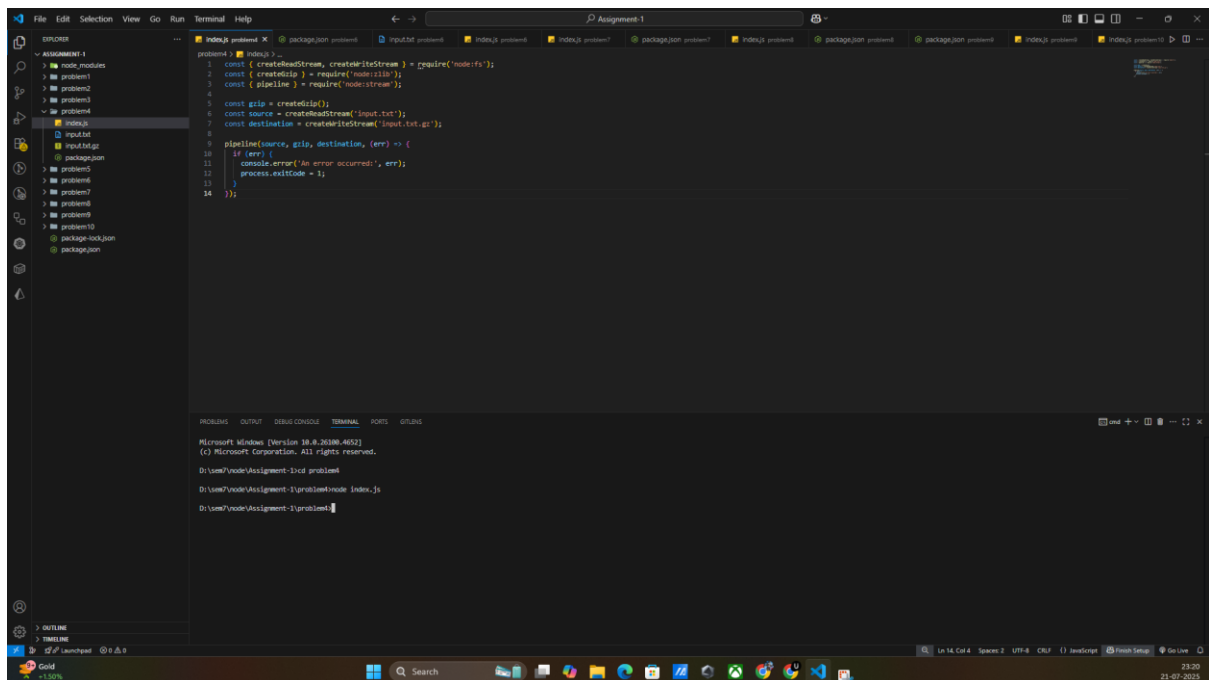

The screenshot shows a VS Code editor with a file named `index.js` and a terminal window. The `index.js` file contains a Node.js script that implements a simple Git helper bot. The script uses `readline` for input/output and `process.stdin` for raw input. It prompts the user to ask questions about Git and provides answers for specific questions. The terminal output shows the bot's interaction with the user.

```
1 const readline = require('readline');
2
3 const gitQA = [
4   "How to commit?", "Use: git add . && git commit -m 'your message'",
5   "How to push?", "Use: git push origin main (or your branch name)",
6   "What is git clone?", "git clone copies a remote repository to your local machine.",
7   "How to initialize git?", "Use: git init to start a new git repository in your project directory."
8 ];
9
10 const rl = readline.createInterface({
11   input: process.stdin,
12   output: process.stdout,
13   prompt: "You: "
14 });
15
16 console.log("Welcome! I'm your Git Helper Bot. Ask me anything about Git.");
17
18 rl.prompt();
19
20 rl.on('line', (input) => {
21   const userInput = input.toLowerCase();
22   let response = "Sorry, I don't know that Git command.";
23
24   for (const question in gitQA) {
25     if (userInput.includes(question)) {
26       response = gitQA[question];
27       break;
28     }
29   }
30
31   console.log("Bot:", response);
32
33   if (userInput === 'bye') {
34     rl.close();
35   } else {
36     rl.prompt();
37   }
38 })
```

D:\code\vscode\assignment-1\code> node index.js
Welcome! I'm your Git Helper Bot. Ask me anything about Git.
You: how to push
Bot: Use: git push origin main (or your branch name)
You: what is git clone
Bot: git clone copies a remote repository to your local machine.
You: bye
Bot: Sorry, I don't know that Git command.
Goodbye! Happy Git-ing!

Problem – 4

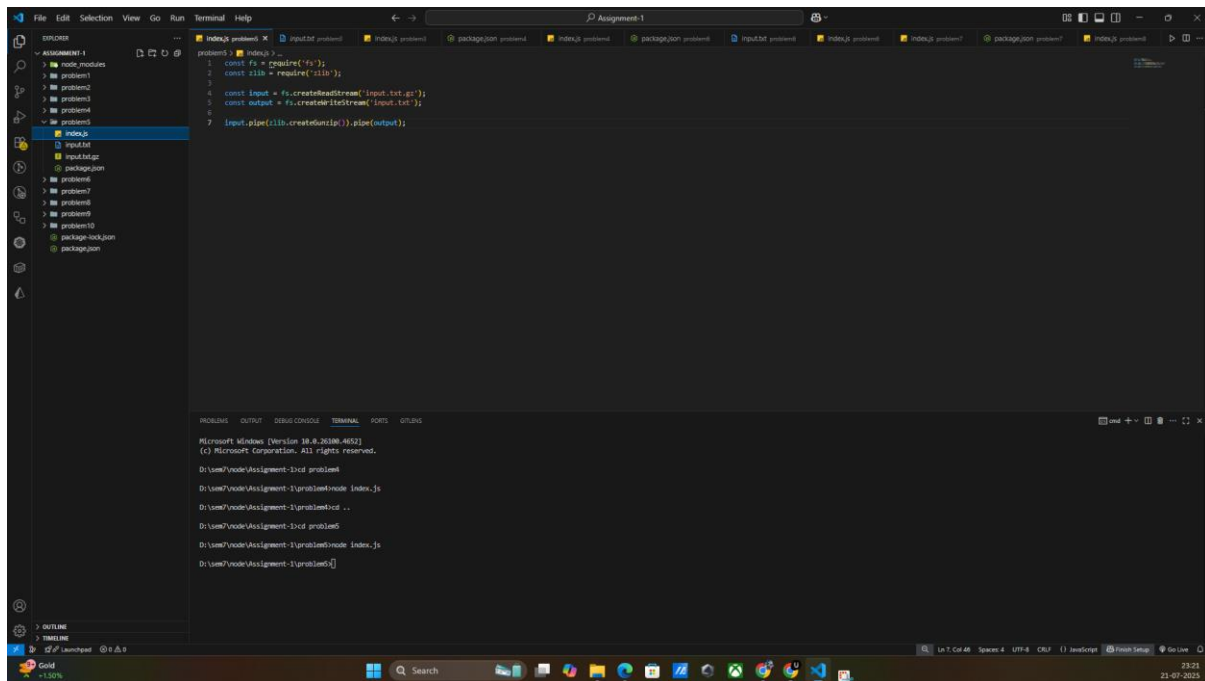

The screenshot shows a VS Code editor with a file named `index.js` and a terminal window. The `index.js` file contains a Node.js script that implements a simple file pipeline. The script uses `fs` to create a readable stream from a file and a writable stream to a file, and then pipes them together. The terminal output shows the bot's interaction with the user.

```
1 const { createReadStream, createWriteStream } = require('node:fs');
2 const { createPipe } = require('node:pipe');
3 const { pipeline } = require('node:stream');
4
5 const src = createReadStream('input.txt');
6 const dest = createWriteStream('output.txt');
7 const pipeline = createWriteStream('output.txt');
8
9 pipeline(src, dest, (err) => {
10   if (err) {
11     console.error('An error occurred:', err);
12     process.exitCode = 1;
13   }
14 })
```

D:\code\vscode\assignment-1\code> node index.js
D:\code\vscode\assignment-1\code>

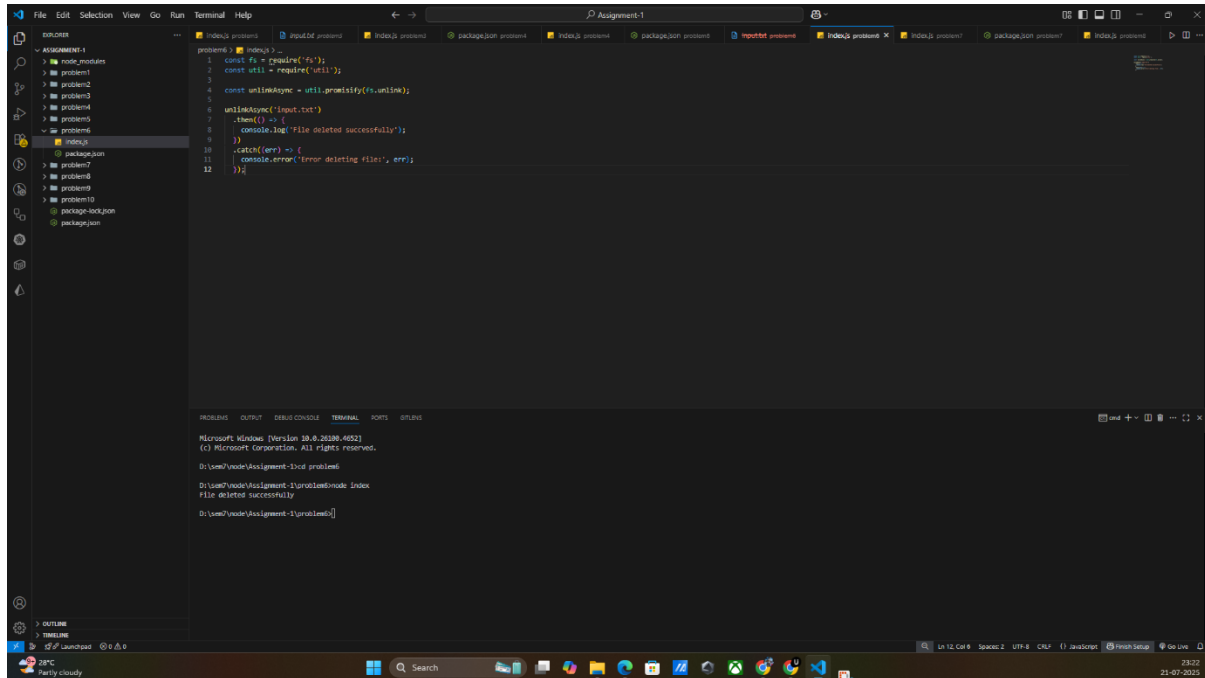

Problem – 5

```
1 const fs = require('fs');
2 const zlib = require('zlib');
3
4 const input = fs.createReadStream('input.txt');
5 const output = fs.createWriteStream('output.txt');
6
7 input.pipe(zlib.createDeflate()).pipe(output);
```

D:\user\vscode\Assignment-1> node index.js

Problem – 6

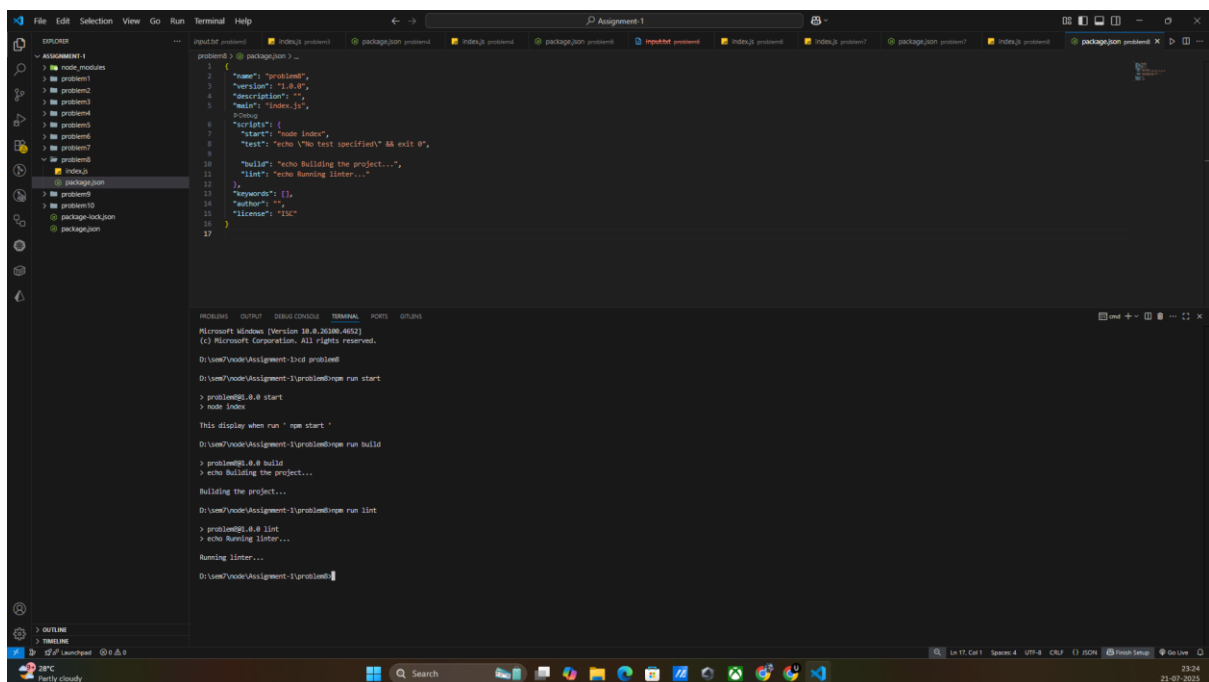

```
1 const fs = require('fs');
2 const util = require('util');
3
4 const unlinkAsync = util.promisify(fs.unlink);
5
6 unlinkAsync('input.txt')
7 .then(() => {
8   console.log('File deleted successfully');
9 })
10 .catch(err => {
11   console.error('Error deleting file:', err);
12 });
```

D:\user\vscode\Assignment-1> node index.js
File deleted successfully
D:\user\vscode\Assignment-1> node index.js

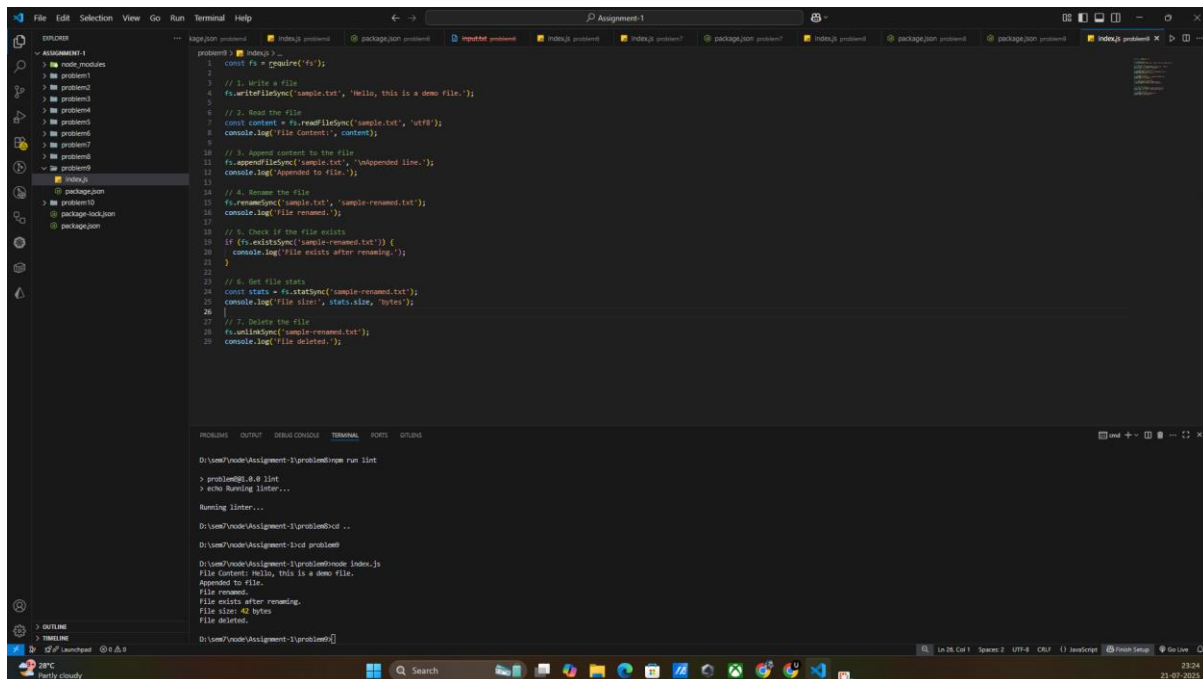

Problem – 7

Problem – 8

Problem – 9

```
1 const fs = require('fs');
2
3 // 1. Write a file
4 fs.writeFileSync('sample.txt', 'Hello, this is a demo file.');
```

```
1
2
3
4
5
6 // 2. Read the file
7 const content = fs.readFileSync('sample.txt', 'utf8');
8 console.log('File Content:', content);
9
10 // 3. Append content to the file
11 fs.appendFileSync('sample.txt', '\nappended line.');
```

```
12 console.log('Appended to file.');
```

```
13
14 // 4. Rename the file
15 fs.renameSync('sample.txt', 'sample-renamed.txt');
```

```
16 console.log('File renamed.');
```

```
17
18 // 5. Check if the file exists
19 if (fs.existsSync('sample-renamed.txt')) {
20   console.log('File exists after renaming.');
```

```
21 }
22
23 // 6. Get file stats
24 const stats = fs.statSync('sample-renamed.txt');
```

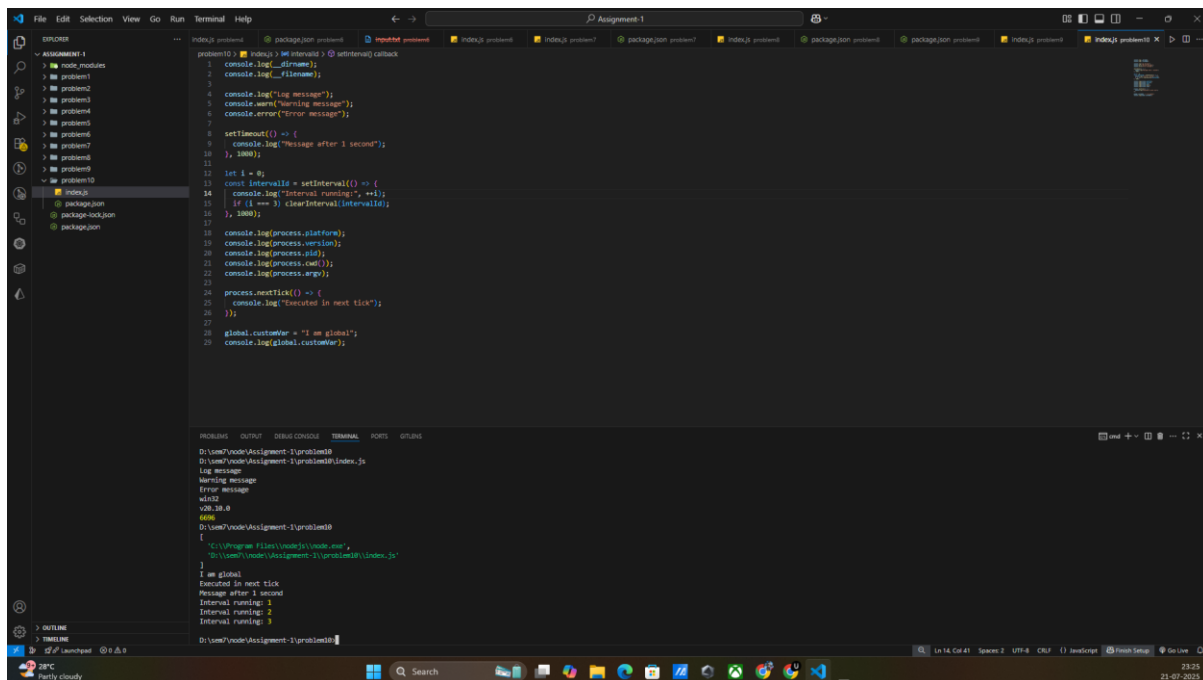

```
25 console.log('File size:', stats.size, 'bytes.');
```

```
26
27 // 7. Delete the file
28 fs.unlinkSync('sample-renamed.txt');
```

```
29 console.log('File deleted.');
```

```
D:\Users\user\Assignment-1>node index.js
File Content: Hello, this is a demo file.
Appended to file.
File renamed.
File exists after renaming.
File size: 42 bytes
File deleted.
```

Problem – 10

```
1 console.log(__dirname);
2 console.log(__filename);
3
4 console.log("log message");
5 console.warn("warning message");
6 console.error("error message");
7
8 setTimeout(() => {
9   console.log("Message after 1 second");
10 }, 1000);
11
12 let i = 0;
13 const intervalId = setInterval(() => {
14   console.log("Interval running:", ++i);
15   if (i === 3) clearInterval(intervalId);
16 }, 1000);
17
18 console.log(process.platform);
19 console.log(process.version);
20 console.log(process.pid);
21 console.log(process.cwd());
22 console.log(process.argv);
23
24 process.nextTick(() => {
25   console.log("Executed in next tick");
26 });
27
28 global.customVar = "I am global";
29 console.log(global.customVar);
```

```
